SUBJECT INDEX

Acting out child 129–177
  outpatient treatment 134
  parenting skills 131
  parent training 134, 138
  parent training follow-up 147
Adjective Checklist Scale 140
Adolescent–parent interaction 151
Adolescents treated for acting out behaviour 147
Affective–evaluative learning 179
Alcohol, effect on fear responses 115
Animal fears 109
Anson House Pre-school Project 26, 28
Anxiety
  depersonalisation 205, 208
  psychogenic vertigo 55, 202, 208
  tinnitus 65
Anxiety-evoking stimuli, exposure therapy 107
Arousal, dizziness and depersonalisation 209
Avoidance response 110
  effect of drugs 115

Barbiturates, effect on fear responses 117
Beck Depression Inventory 150
Behaviour
  discrimination learning in handicapped children 40
  individual training 17
  object-related play in ability-integrated classroom 25
  parent–child interaction 142
  room management 7, 9
Behaviour Rating scale 140
Benzodiazepines, effect on fear responses 116
Biofeedback, tinnitus 93

Catecholamines, effect on fear responses 118
Children's Depression Inventory 149
Classroom, object-related social play 25
Classroom organisation, mental handicap 7
Coercive behaviour 133
Competence
  children 149
  parents 150
Conditioning, evaluative 179
Conflict Behaviour Questionnaire 149
Contingency awareness 189
Contingent reinforcement
  discrimination learning in handicapped children 42
  phobias 113
Cornell Medical Index 59, 72
Cortisol, effect on fear responses 119
Counterconditioning, phobias 113
Crown Crisp Experimental Index 64, 97

Delinquency 132
Depersonalisation 201, 204
  cognitions 209
  dizziness symptoms 207
  therapy 214
Depression
  adult 150
  children 149
  hearing impairment 77
Diazepam, effect on fear responses 116
Discrimination learning in handicapped children 39
Distraction
  fear 112
  tinnitus 94
Dizziness 201–218
  cognitions 209
  depersonalisation 207
  psychogenic 53, 202
  therapy 214
Down's syndrome, object-related social play 25
Dyadic Adjustment Scale 151

Electromechanical car 41
Emotion and otological symptoms 53–103
  hearing loss 66
  Menière's disease 57
  tinnitus 86
  vertigo 53, 57, 203
β-Endorphin, effect on fear responses 119
Environments, mental handicap 3, 7, 25, 39
Epinephrine, effect on fear responses 118
Equilibratory system disorders 53
Escape and avoidance behaviours, extinction 109
  effect of drugs 115
Evaluative conditioning 179–199
  extinction 181, 185
  memory effects 192
Exposure therapy, fear 105–127
  effect of drugs 115
  neuroendocrine effects 118

Extinction of escape and avoidance behaviour in animals 109
effect of drugs 115
Extinction, evaluative conditioning 181, 185
Eysenck Personality Inventory 59, 64, 78, 83

Fear, exposure therapy 105–127
effect of drugs 115
neuroendocrine effects 118
Field dependence 211
Fine Motor Skill Assessment Battery 27
Flooding 110

General Health Questionnaire 76
Group activity, mental handicap 15, 20

Hearing loss 66
emotional effects 70
psychological causation 67
psychological effects 70
Home Attitude Scale 140
Hypnotherapy, tinnitus 93
Hysterical hearing loss 69

Individual training, mental handicap 8, 17, 20
Intercranial stimulation, fear 113
Issues Checklist 149

Laws of sympathetic magic 197
Learning, signal- and affective–evaluative 179

Memory, evaluative conditioning 192
Menière's disease
psychological factors 57, 203
somatotype 65
Mental handicap
discrimination learning using an electromechanical car 39
object-related social play 25
purposeful activity in micro-environments 3, 7
Microelectronic technology, handicapped children 39
Middlesex Hospital Questionnaire 78
Mother–adolescent interaction 151

NITTS 67, 68
Noise-induced hearing loss 67
Nonambulatory, Profoundly Mentally Retarded 39
Noncomplient behaviour, parent training 138

Object Related Social Acts 30, 33
Object-related social play 25
O'Leary–Porter Scale 151
Opiates, effect on fear responses 119
Organizational design, mental handicap 7, 25
Otological symptoms and emotion 53–103
hearing loss 66
Menière's disease 57
tinnitus 86
vertigo 53

Paranoia, role of hearing loss 82
Parent–adolescent interaction 151
Parent attitude Test 140
Parent–child interaction 133, 141
Parent Competency Inventory 150
Parent training 134, 138
follow-up 147
problems 171
trainers 169
Parenting skills 131
Perceived Competence Scale for Children 149
Personality
hearing loss 70
physique 65
susceptibility to noise-induced hearing loss 67
tinnitus 96
Person density and behaviour 15
Phobias, exposure therapy 105–127
effect of drugs 115
neuroendocrine effects 118
Phobias, space 211
Phobic Anxiety Depersonalisation Syndrome 205
Play materials, mentally handicapped children 25
Psychogenic vertigo 53, 203
Psychosomatic factor in Menière's disease 57
Purposeful activity, mental handicap 7

Rating Scale of Child's Actual Competence 150
Reinforcement, phobias 113
Relaxation
depersonalisation 206
tinnitus 94
Response prevention 110
Revised Behaviour Problem Checklist 148
Room management, mental handicap 3, 7, 9
comparison with individual training 17, 20
comparison with small groups 15, 20

Signal-learning 179, 181
Skin conductance responses 183
Small groups, training in mental handicap 15, 20
Social facilitation, fear 112
Social learning, therapists 169
Socially Directed Behaviour 30
Socially Directed Looking 30
Social play, object-related ability-integrated classroom 25
Somatotype and Menière's disease 65
Space phobias 211
Spiral after-effect 55
Stress, Menière's disease 60
Suspiciousness, hearing loss 82
Symptoms of Anxiety and Depression Scale 73

Tension, Menière's disease 60
Time-out 144
Tinnitus
  anxiety 65
  personality 96
  psychological component 86
  psychological therapies 92

Vertigo
  Menière's disease 57
  organic 57
  psychogenic 53, 202
  stress 60

SUBJECT INDEX

Abnormal Involuntary Movement Scale 194
Abstinence
  alcohol abusers 152, 154
  smoking 210
Abuse Status and Health History Interview 28
Academic Disability 24
Acting-out children, hospitalization 1–67
Addiction Severity Index 135, 139, 144
Adolescent drug use 135
Affect sensitivity 177
Aggression 2, 24, 26
Agoraphobia 128
AIDS, fear of 69–115
  FAIDSS 79, 82, 112
  FSS 80, 91
  phobia 73, 97, 102
Alcohol abusers, treatment outcome methodology 151–160
Antisocial children, hospitalization 1–67
  alternative models of treatment 55
  assessment 21
  changes over time 33, 37
  effectiveness 9
  follow-up studies 13, 36
  prediction of clinical status 48
Anxiety
  AIDS 72
  coping modes 238, 243
Anxiety Disorders Interview Schedule 122
Anxiety disorders, treatment outcome evaluation methodology 121–132
Areas of Change Questionnaire 176
Attentional processes, self-regulation 250
Attitude structure model 79
Attrition
  anxiety disorders 129
  bulimia 172
  marital therapy 184
  smoking cessation 211
Avoidance behavior 263

Beck Depression Inventory 28
Behavioral control 263
Behavioral coping responses 263
Behavioral family therapy 198
Behavioral observation
  marital problems 181
  schizophrenics 195
Binge-eating 162, 168
Blood/Injury fear 76, 93, 96
Blunting behaviors 226
Body image 170
Brief Psychiatric Rating Scale 193
Bulimia, treatment outcome methodology 161–174

Camberwell Family Interview 195
Carboxyhemoglobin, smoking status 208
Child Behavior Checklist 24, 33, 38, 43
Children's Action Tendency Scale 26, 46, 47
Children's Hostility Inventory 26
Cognitive avoidance 236
  measurement 240
Cognitive-behavior therapy, bulimia 161, 163, 165
Cognitive coping styles 225, 228, 264
Community treatment, antisocial youths 11
Comorbidity 216
  anxiety disorders 124
Conduct disorder 2, 16
  assessment 21
  changes over time 33, 37
  chronic disease model 60
  diagnosis 32
  hospitalization 4, 18
  intervention models 56
  parent and family characteristics 19
  therapeutic processes 8, 55
Confrontation, drug dependence 142
Coping
  psychophysiological reactions 259–270
  threat and frustration 223
Coping modes 235–248
  cognitive avoidance 236, 240
  vigilance 236, 240
Corrective self-regulation 251
Corticosteroids and coping 260
Cotinine, smoking status 207
Couples Interaction Scoring System 176
Covert behavior 25

Delay tolerance 226, 252
Depression
  anxiety disorders 122
  bulimia 162
  parents of antisocial children 20
  reaction to life events 272, 276
Diagnostic Interview Schedule 122
Displacement activities 264
Distraction, stress 225, 230
Drinking behavior 151

Drug dependence, treatment outcome methodology 133–150
Dyadic Adjustment Test 176, 179

Eating Disorders Examination 170
Eating disorders, treatment outcome methodology 161–174
Emotional disorder 127
Emotion-focussed coping 262, 264
Epidemiological Problem Analysis 284
Exposure and vomit prevention 165
Expressed emotion 195
Eyberg Child Behavior Inventory 26

Family assessment, schizophrenics 195
Family Environment Scale 28
Family interaction patterns 196
Family treatment, schizophrenics 198
Fear of AIDS 69–115
  FAIDSS 79, 82, 112
  FSS 80, 91
Fear of AIDS Scale 74
Fear of AIDS Schedule 79, 82, 112
  correlations with background data 94
  FSS-III correlates 91
  normative data 96
Fear Survey Schedule 79, 80
  FAIDSS correlates 91
Free fatty acids, presurgical stress 243
Frustration, coping 223–234

Global Adjustment Scale 194
Gratification delay 226, 253

Hamilton Scales 122
Helplessness 273
Homesickness 273
Hopkins Symptom Checklist-90 27
Hospitalization of antisocial children 1–67
  alternative models of treatment 55
  assessment 21
  changes over time 33, 37
  effectiveness 9
  follow-up studies 13, 36
  prediction of clinical status 48
Hostility 24, 26
Human Immunodeficiency Virus 70
  testing 106

Imipramine, binge-eating 169
Impulsive children, coping strategies 230
Information seeking, coping 264
Interpersonal psychotherapy, bulimia 162
Interview for Antisocial Behavior 25
Interview rating scales, schizophrenia 193
Intrusive thoughts 127

Kategoriensystem für Partnerschaftliche Interaktion 176
Katz Adjustment Scales 195
Kiddie Choice Survey 227

Learned helplessness 274
Learned resourcefulness 249, 253
Life events, vulnerability of the depressed 271–286
Low Need Achievement 24

Mainz Coping Inventory 240
Manifest Anxiety Scale 266
Marital Adjustment Test 176
Marital Interaction Coding System 176
Marital Satisfaction Inventory 176
Marital therapy, methodological issues 175–189
Matson Evaluation of Social Skills with Youngsters 27, 46, 47
Minimax Hypothesis 224
Monitoring behaviors 226
Monitoring and blunting hypothesis 223
Mood, reaction to life events 273
Multiple drug use 134, 136

Neuroendocrine response and coping 260
Nicotine gum 203

Obsessive–compulsive disorders 123, 126
Opioid dependence 139
Overt behavior 25

Panic disorder 123, 127, 128
Parents, antisocial children 46
Phobia
  AIDS 72, 97, 102
  anxiety disorders 123
Present State examination 192
Problem-focussed coping 263
Problem-solving strategies, stress 255
Project Re-Ed 12
Psychiatric hospitalization, antisocial children 4
Psychophysiological reactions and coping 259–270
Purging 168, 169

Race, FAIDSS 95
Redressive self-regulation 250
Re-Ed programs 12
Reformative self-control 251, 252
Relaxation 231
Repression–Sensitization Scale 265
Repressive coping 237, 240, 266
Residential treatment
  antisocial children 4

drug dependence 141
Resourcefulness and stress 249, 253
Risk, antisocial youths 29

Scale for the Assessment of Negative Symptoms 194
Schedule for Affective Disorders and Schizophrenia 27, 122, 192
Schizophrenia, treatment outcome methodology 191–200
School Behavior Checklist 24, 33, 38
Self-Control Schedule 253
Self-control under stress 249
  automatic 250
  redressive 250
  reformative 251
Self-reports
  alcohol abusers 152
  drug dependence 137
  marital therapy 176
  schizophrenics 193
  smoking cessation 203
  stress coping strategies 224, 227
Sensitizers 237, 240
Sex
  antisocial children 50
  fear of AIDS 82, 94
Sexual abuse 28
Sexually-transmitted diseases 69, 85
Signal-detection theory 238
Smoking cessation, treatment outcome methodology 201–214
Social Adjustment Scale II 194
Social Desirability Scale 266
Social phobia 127
State anxiety, presurgical reactions 243
Stress management
  coping modes 235
  psychophysiological reactions 259
  resourcefulness 249
  threat and frustration 223
  vulnerability of the depressed to life events 271
Structured Clinical Interview for DSM-III 122, 192
Structured conversations, family interaction patterns 196
Structured interviews 216
  anxiety disorders 121
  schizophrenics 192
Surgery, stress coping strategies 243

Thiocyanate, smoking status 207
Threat, coping with 223–234, 236, 240
Time-Line, binge-eating 170
Time-Sample Behavioral Checklist 196
Total Behavior Problem 43, 48
Total Social Competence 46, 49
Treatment manuals 125
  marital problems 176
Treatment outcome methodology 119, 215
  alcohol abuse 151
  anxiety disorder 121
  bulimia 161
  drug dependence 133
  marital problems 175
  schizophrenia 191
  smoking cessation 201

Vigilance, coping 236
  measurement 240
Virus of fear model 71

Ways of Coping Scale 255
Weight, bulimia 162, 168, 170

Youths, antisocial, impact of hospitalization 11
Youth Level of Service Inventory 29
